APPLICATIONS BUILT

Sidekick   Website Link
• Tools: ReactJS, MongoDB, Facebook API
• This application prompts the user to log in through Facebook authentication, the user will then create a profile and select an activity in which they need a buddy for. After selecting an activity, the user will be presented with people in the area that also want to do that specific activity.

Audia Aura   Website Link
• Tools: HTML, CSS, jQuery, Bootstrap, D3, Spotify API, MySQL
• An application that pulls music from Spotify based on your mood and tracks it in a graph.

Dive Into DC   Website Link
• Tools: HTML, CSS, jQuery, Materialize, Ajax, Google Maps API, Google Places API, JSON
• An application for DC travelers that want a personalized itinerary based on individual needs.

DEVELOPMENT EXPERIENCE

Little Angels Daycare, Ashburn, VA, 2016 - 2017   Website Link
Web Developer
• Developed a website for a small business that included customer reviews, google map directions, and a contact form directly linked to owners email address. The site is accessible through Google and can be easily searched
• Business has doubled since the sites deployment.

PROFESSIONAL EXPERIENCE

Field Operations Coordinator, Kforce, 2016 - 2017
• Completed full on-boarding cycle for all federal and commercial consultants
• Performed a variety of operational duties in support of business development, sales
• Delivery processes as well as Consultant and Client experience

Human Resources Intern, Truth Initiative, 2015 - 2016
• Assisted with updating benefits information into and HRIS
• Worked directly with candidates to distinguish qualified employees
• Assisted with performance management projects
